

# BCHW CORONAVIRUS SAFETY PLAN

1. Each worksite must have a designated coronavirus supervisor present.
2. Discuss this plan in tailgate safety briefings.
3. Social Distancing of at least 6 feet of separation must be maintained whenever possible, including breaks. Volunteers from the same household need not observe this 6 foot separation mandate.
4. PPE including masks and eye protection must be worn when working.
5. Volunteers should sanitize their hands regularly, before and after going to the bathroom, before and after eating and after coughing, sneezing or blowing their nose. Use alcohol-based hand sanitizers with greater than 60% ethanol or 70% isopropanol.
6. Frequently clean and disinfect high-touch surfaces on tools, machines, vehicles and other equipment.
7. All participants must be interviewed daily and answer these questions in the negative:
  - a. Do you have a fever?
  - b. Do you have cough?
  - c. Do you have shortness of breath?
  - d. Do you have fatigue?
  - e. Do you have muscle aches?
  - f. Do you have new loss of taste or smell?
8. Anyone showing the above coronavirus symptoms must take their own temperature. If their temperature exceeds 100.4F they must notify the coronavirus Supervisor. Anyone exceeding 100.4F may be re-checked after sitting alone for 5 minutes.
9. Anyone exceeding 100.4F on the re-check must not participate in the work party. They are considered to have a fever and must be sent home.
10. A record of anyone who may have been exposed to them must be retained.
11. Any tools or other surfaces used by the sick volunteer must be disinfected.
12. Anyone who has a family member at home sick with coronavirus must notify the coronavirus supervisor and must not participate in the work party and must be sent home.
13. Adhere to the requirements of this guideline as long as Washington State Government restrictive measures for the coronavirus are in place. If those restrictions are lifted, adherence to the requirements in this document is no longer mandatory
